

CASE 1 – FAMILY DOCTOR FOLLOW-UP

Chronic Migraine + Medication Overuse Headache + Work Stress

(Long-form Hinglish consultation designed for transcription testing)

Patient Details

Patient Name: Pooja Mehta

Age: 29 years

Gender: Female

Occupation: Software Engineer

Visit Type: Follow-up Visit (Known Patient)

Known History:

- Migraine for 7 years
 - Frequent headaches for the last 8 months
 - Seen by the same family doctor multiple times
 - Started on migraine prophylaxis 3 months ago
-

Doctor–Patient Conversation

Doctor: Namaste Pooja. Kaise ho? Last time humne migraine prevention wali medicine start ki thi.

Patient: Namaste doctor. Thoda improvement hua tha pehle, lekin pichhle 3-4 weeks se headaches phir badh gaye hain.

Doctor: Accha. Pichli baar kitne headache days per month the?

Patient: Lagbhag 15-16 din.

Doctor: Aur ab?

Patient: Shayad 12-13 din.

Doctor: Toh thoda improvement hua hai.

Patient: Haan, lekin abhi bhi kaafi problem hai.

Headache History

Doctor: Headache exactly kaisa hota hai?

Patient: Mostly right side pe hota hai.

Doctor: Throbbing ya pressure type?

Patient: Dhak-dhak jaisa.

Doctor: Severity?

Patient: Kabhi kabhi itna hota hai ki laptop dekhna mushkil ho jata hai.

Doctor: Nausea?

Patient: Haan.

Doctor: Vomiting?

Patient: Kabhi kabhi.

Doctor: Light se problem hoti hai?

Patient: Bahut.

Doctor: Sound se?

Patient: Haan.

Doctor: Headache start hone se pehle koi warning milti hai?

Patient: Kabhi kabhi aankhon ke saamne flashes dikhte hain.

Doctor: Kitni der pehle?

Patient: 20-30 minute.

Medication Review

Doctor: Maine jo preventive medicine di thi, regular le rahi ho?

Patient: Mostly.

Doctor: Mostly matlab?

Patient: Week mein ek-do dose miss ho jati hai.

Doctor: Aur painkiller?

Patient: Wo toh frequently leti hoon.

Doctor: Kitni frequently?

Patient: Shayad 4-5 baar week mein.

Doctor: Kaunsi?

Patient: Combiflam ya Saridon.

Doctor: Har headache pe?

Patient: Haan.

Doctor: Ye important hai.

Work & Lifestyle History

Doctor: Office workload kaisa hai?

Patient: Kaafi stressful.

Doctor: Daily screen time?

Patient: 10-12 hours.

Doctor: Breaks leti ho?

Patient: Nahi.

Doctor: Sleep kitni hoti hai?

Patient: 5 ya 6 ghante.

Doctor: Weekend pe?

Patient: Tab bhi zyada nahi.

Doctor: Water intake?

Patient: Honestly bahut kam.

Trigger Assessment

Doctor: Kya notice kiya hai ki headache kin situations mein trigger hota hai?

Patient: Jab meal skip karti hoon.

Doctor: Aur?

Patient: Stress mein.

Doctor: Periods ke around?

Patient: Haan.

Doctor: Strong perfumes ya loud noise?

Patient: Kabhi kabhi.

Doctor: Coffee kitni peeti ho?

Patient: 4-5 cups.

Doctor: Roz?

Patient: Haan.

Doctor: Ye bhi trigger ho sakta hai.

Red Flag Screening

Doctor: Main kuch important questions poochunga.

Patient: Ji.

Doctor: Life ka sabse severe headache kabhi hua?

Patient: Nahi.

Doctor: Sudden onset headache?

Patient: Nahi.

Doctor: Fever?

Patient: Nahi.

Doctor: Weakness ya body ke kisi side mein power kam hui?

Patient: Nahi.

Doctor: Speech problem?

Patient: Nahi.

Doctor: Seizures?

Patient: Nahi.

Physical Examination

Vital Signs

BP: 118/74 mmHg

Pulse: 76/min

Temperature: Normal

SpO₂: 99%

Weight: 68 kg

Clinical Findings (spoken aloud)

Doctor: Patient comfortable lag rahi hai.

No focal neurological deficit.

Cranial nerves grossly normal.

Motor examination normal.

Sensory examination normal.

No neck stiffness.

Clinical Discussion

Doctor: Pooja, mujhe lag raha hai ki migraine toh hai hi, lekin ek aur cheez develop ho gayi hai.

Patient: Kya?

Doctor: Medication Overuse Headache.

Patient: Matlab?

Doctor: Jab painkillers bahut frequently liye jate hain toh woh khud headache ko maintain karne lagte hain.

Patient: Accha.

Doctor: Aur stress, sleep deprivation aur excessive screen time bhi contribute kar rahe hain.

Differential Diagnosis

1. Chronic Migraine
 2. Migraine with Aura
 3. Medication Overuse Headache
 4. Stress-Related Headache Component
 5. Tension-Type Headache Overlap
-

Investigations Ordered

Doctor: Abhi neurological exam normal hai, lekin baseline ke liye kuch tests kar lete hain:

- CBC
- Thyroid Profile
- Vitamin B12
- Vitamin D3
- Blood Sugar
- MRI Brain only if symptoms worsen or new neurological symptoms appear

Patient: MRI abhi zaroori nahi hai?

Doctor: Filhal nahi lag raha.

Prescription

Tab Propranolol 40 mg

- Once daily at bedtime

Tab Naproxen 250 mg

- SOS during migraine attack
- Maximum as advised

Tab Pantoprazole 40 mg

- Before breakfast

Tab Vitamin B12

- Once daily

Cap Vitamin D3 60,000 IU

- Once weekly for 8 weeks
-

Migraine Counseling

Doctor: Sabse important treatment medicine nahi hai.

Patient: Fir?

Doctor: Lifestyle.

Patient: Kaise?

Doctor: Migraine diary maintain karo.

Patient: Theek.

Doctor: Har headache episode note karo.

Doctor: Time, trigger, severity, medicine sab likho.

Patient: Okay.

Advice / Instructions

Doctor:

- Painkiller overuse band karna hai.
- Daily sleep 7–8 hours.
- Meals skip nahi karne.
- Water intake minimum 2.5 litres.
- Screen breaks every 45 minutes.
- Regular exercise start karo.
- Coffee gradually reduce karke 1–2 cups per day.

Patient: Coffee kam karna sabse difficult hoga.

Doctor: Migraine bhi toh difficult hai.

Patient: Fair enough. (laughs)

Follow-Up Plan

Doctor: Migraine diary lekar 6 weeks baad aana.

Patient: Theek hai.

Doctor: Agar headache pattern suddenly change ho, weakness ho, ya vision loss ho toh immediately contact karna.

Patient: Ji doctor.

Doctor: Take care Pooja.

Patient: Thank you doctor.

CASE 2 – FAMILY DOCTOR FOLLOW-UP

GERD (Acid Reflux) + Fatty Liver + Lifestyle-Related Health Issues

(Long-form Hinglish consultation designed for medical transcription testing)

Patient Details

Patient Name: Sandeep Kulkarni

Age: 45 years

Gender: Male

Occupation: Business Owner

Visit Type: Follow-up Visit (Known Patient)

Known History:

- GERD (Gastroesophageal Reflux Disease) for 3 years
 - Grade I Fatty Liver
 - Overweight
 - Regular patient for more than 8 years
-

Doctor–Patient Conversation

Doctor: Namaste Sandeep ji, kaise ho? Pichli baar acidity kaafi improve hui thi na?

Patient: Namaste doctor saab. Haan improve hui thi, lekin pichhle ek mahine se phir se problem shuru ho gayi hai.

Doctor: Kaisi problem?

Patient: Seene mein jalan rehti hai. Especially raat ko.

Doctor: Roz hoti hai ya kabhi kabhi?

Patient: Almost roz.

Doctor: Khane ke kitni der baad?

Patient: Dinner ke baad zyada.

Doctor: Dinner kitne baje karte ho?

Patient: Kabhi 10 baje, kabhi 11 baje.

Doctor: Aur sone kitni der baad jaate ho?

Patient: Bas aadha ghanta ya ek ghanta baad.

Doctor: Hmmm. Yehi ek major reason ho sakta hai.

Detailed Symptom History

Doctor: Jalan exactly kahan hoti hai?

Patient: Yahan chest ke beech mein.

Doctor: Khatta paani ya food mouth mein wapas aata hai?

Patient: Haan doctor. Kabhi kabhi lagta hai khana upar aa raha hai.

Doctor: Sour taste?

Patient: Bilkul.

Doctor: Raat mein neend khulti hai acidity se?

Patient: Haan, hafte mein 2-3 baar.

Doctor: Khansi hoti hai?

Patient: Dry cough kabhi kabhi.

Doctor: Gala kharab rehta hai subah?

Patient: Haan.

Lifestyle Assessment

Doctor: Chaliye ab sach sach batao. Diet ka kya haal hai?

Patient: (laughs) Doctor saab business mein time hi nahi milta.

Doctor: Matlab?

Patient: Breakfast skip kar deta hoon.

Doctor: Aur lunch?

Patient: Kabhi 2 baje, kabhi 4 baje.

Doctor: Tea kitni baar?

Patient: 5-6 cups.

Doctor: Coffee?

Patient: 2 cups.

Doctor: Spicy food?

Patient: Kaafi.

Doctor: Outside food?

Patient: Week mein 4-5 baar.

Weight & Exercise Discussion

Doctor: Weight kam hua ya badha?

Patient: Shayad badha.

Doctor: Exercise?

Patient: Bilkul nahi.

Doctor: Walk?

Patient: Business hi meri exercise hai. (laughs)

Doctor: Ye dialogue main roz sunta hoon.

Patient: (laughs)

Fatty Liver Follow-Up

Doctor: Last ultrasound yaad hai?

Patient: Fatty liver bola tha.

Doctor: Haan Grade I Fatty Liver.

Patient: Serious hai kya?

Doctor: Filhal dangerous nahi hai, lekin lifestyle improve nahi kiya toh progression ho sakta hai.

Patient: Accha.

Alcohol & Smoking History

Doctor: Alcohol?

Patient: Weekend pe.

Doctor: Kitna?

Patient: 2-3 drinks.

Doctor: Har weekend?

Patient: Mostly.

Doctor: Smoking?

Patient: Nahi.

Alarm Symptoms Screening

Doctor: Weight loss hua unexpectedly?

Patient: Nahi.

Doctor: Vomiting mein blood?

Patient: Nahi.

Doctor: Black stools?

Patient: Nahi.

Doctor: Food swallow karne mein difficulty?

Patient: Nahi.

Doctor: Chest pain exertion se hota hai ya sirf acidity jaisa?

Patient: Mostly khane ke baad.

Physical Examination

Vital Signs

BP: 136/86 mmHg

Pulse: 82/min

Weight: 92 kg

BMI: 31 kg/m²

Clinical Findings (spoken aloud)

Doctor: Obesity present hai.

Abdominal examination soft.

No tenderness.

No organomegaly palpable.

No jaundice.

Clinical Discussion

Doctor: Sandeep ji, mujhe lag raha hai ki GERD phir se flare hua hai.

Patient: Sirf acidity hai ya kuch serious?

Doctor: Filhal symptoms reflux ke hi lag rahe hain.

Patient: Accha.

Doctor: Late-night meals, tea, coffee, weight gain aur irregular eating habits sab contribute kar rahe hain.

Differential Diagnosis

1. GERD (Acid Reflux Disease)
 2. Gastritis
 3. Hiatal Hernia
 4. Functional Dyspepsia
 5. Lifestyle-Related Reflux Exacerbation
-

Investigations Ordered

Doctor: Kuch tests repeat karte hain:

- CBC
- Liver Function Test
- Fasting Blood Sugar
- HbA1c
- Lipid Profile
- Ultrasound Abdomen
- Upper GI Endoscopy (if symptoms persist)

Patient: Endoscopy zaroori hai?

Doctor: Abhi nahi. Agar treatment ke baad bhi symptoms rahe toh.

Prescription

Tab Pantoprazole 40 mg

- Once daily before breakfast

Tab Domperidone 10 mg

- Before meals, twice daily

Antacid Suspension

- 10 ml SOS for severe acidity

Tab Ursodeoxycholic Acid 300 mg

- Twice daily (if previously prescribed and indicated)
-

Lifestyle Counseling

Doctor: Medicines se zyada lifestyle important hai.

Patient: Fir wahi lecture? (laughs)

Doctor: Bilkul wahi lecture.

Patient: Theek hai.

Doctor: Dinner sone se kam se kam 3 ghante pehle.

Patient: Okay.

Doctor: Bed ka head-end thoda elevate karo.

Patient: Theek.

Doctor: Tea aur coffee kam karo.

Patient: Ye difficult hoga.

Doctor: Acidity bhi difficult hai.

Patient: Fair point.

Advice / Instructions

Doctor:

- Weight reduction target 8-10 kg.
- Late-night meals avoid karo.
- Fried aur spicy food kam karo.
- Smoking avoid karo (if exposed).
- Alcohol minimize karo.
- Regular walk 30-40 minutes.
- Breakfast skip mat karo.

Patient: Ji doctor.

Follow-Up Plan

Doctor: Reports lekar 1 month baad aana.

Patient: Theek hai.

Doctor: Agar vomiting, blood in stool, severe chest pain ya swallowing difficulty ho toh immediately consult karna.

Patient: Zaroor.

Doctor: Aur business ko thoda kam stress do.

Patient: Wo prescription mein likh dijiye. (laughs)

Doctor: Kaash uski bhi tablet hoti.

Patient: (laughs)

Doctor: Take care Sandeep ji.

Patient: Thank you doctor saab.

CASE 3 – FAMILY DOCTOR FOLLOW-UP

Seasonal Allergic Rhinitis + Mild Sinusitis

(Short Follow-Up Case with 3 Medicines)

Patient Details

Patient Name: Rohit Patil

Age: 27 years

Gender: Male

Known History:

- Seasonal allergies
 - Previously treated by same family doctor 1 month ago
-

Doctor–Patient Conversation

Doctor: Namaste Rohit, kaise ho? Allergy kaise chal rahi hai?

Patient: Namaste doctor. Pehle medicines se kaafi relief tha, lekin pichhle 1 week se phir se chheenk aur naak band rehna shuru ho gaya hai.

Doctor: Subah zyada hota hai ya poore din?

Patient: Subah uthte hi 10-15 chheenke aati hain.

Doctor: Naak se paani aa raha hai?

Patient: Haan, bilkul paani jaisa.

Doctor: Fever ya body ache?

Patient: Nahi.

Doctor: Face ya forehead mein heaviness lagti hai?

Patient: Haan doctor, especially aankhon ke upar pressure lagta hai.

Doctor: Dust exposure hua tha recently?

Patient: Ghar ki safai chal rahi thi weekend pe.

Doctor: Accha, usse trigger ho gaya hoga.

Clinical Examination

BP: 118/76 mmHg

Pulse: 80/min

Temperature: Afebrile

Nasal mucosa congested

Mild sinus tenderness present

Throat normal

Differential Diagnosis

1. Seasonal Allergic Rhinitis
 2. Mild Acute Sinusitis
 3. Dust-Induced Allergy Flare
-

Investigations

No investigations required currently.

Prescription

Tab Levocetirizine 5 mg

- Once daily at night for 7 days

Fluticasone Nasal Spray

- 2 sprays in each nostril once daily

Tab Paracetamol 500 mg

- SOS for headache or facial pain
-

Advice

Doctor: Dust exposure avoid karo, mask use karo aur steam inhalation din mein 1-2 baar kar lena.

Patient: Theek hai doctor.

Doctor: Agar fever aa jaye ya symptoms 1 week mein improve na ho toh phir dikhana.

Patient: Sure.

Doctor: Take care.

CASE 1 – NEW PATIENT INTERACTION

Young Female with Palpitations, Weight Loss & Suspected Hyperthyroidism

(Long-form Hinglish consultation designed for healthcare transcription testing)

Patient Registration

Doctor: Namaste, please aaiye aur baithiye.

Patient: Namaste doctor.

Doctor: Aap pehli baar clinic mein aayi hain?

Patient: Ji.

Doctor: Theek hai, pehle basic details le lete hain.

Doctor: Aapka naam?

Patient: Riya Kapoor.

Doctor: Umar?

Patient: 26 saal.

Doctor: Occupation?

Patient: MBA student hoon.

Doctor: Married ya unmarried?

Patient: Unmarried.

Doctor: Kahan rehti hain?

Patient: Baner, Pune.

Chief Complaint

Doctor: Toh Riya, aaj kis problem ke liye aayi ho?

Patient: Doctor, pichhle 2-3 mahine se dil bahut tez dhadakta hai.

Doctor: Har waqt ya kabhi kabhi?

Patient: Kabhi kabhi achanak start ho jata hai.

Doctor: Aur koi symptom?

Patient: Weight bhi kam ho raha hai aur haath kaapte rehte hain.

History of Present Illness

Doctor: Weight kitna kam hua?

Patient: Lagbhag 6 kilo.

Doctor: Dieting kar rahi thi?

Patient: Nahi.

Doctor: Bhook kaisi hai?

Patient: Pehle se zyada lagti hai.

Doctor: Accha. Phir bhi weight kam ho raha hai?

Patient: Haan.

Doctor: Palpitations kitni der tak rehte hain?

Patient: Kabhi 5 minute, kabhi aadha ghanta.

Doctor: Exercise ya stress se badhte hain?

Patient: Stress mein zyada feel hota hai.

Doctor: Pasina zyada aata hai?

Patient: Bahut.

Doctor: Dusre log normal feel karte hain aur aapko garmi lagti hai?

Patient: Exactly.

Doctor: Neend kaisi hai?

Patient: Bahut kharab ho gayi hai.

Doctor: Irritability ya mood swings?

Patient: Haan, family wale bhi bolte hain ki main jaldi gussa karne lagi hoon.

Menstrual History

Doctor: Periods regular hain?

Patient: Pehle the, ab irregular ho gaye hain.

Doctor: Last period kab hua tha?

Patient: Lagbhag 2 mahine pehle.

Doctor: Pregnancy ka koi chance?

Patient: Nahi.

Past Medical History

Doctor: Pehle kabhi thyroid problem hui thi?

Patient: Nahi.

Doctor: Diabetes?

Patient: Nahi.

Doctor: BP?

Patient: Nahi.

Doctor: Koi hospitalization?

Patient: Nahi.

Medication History

Doctor: Koi medicines ya supplements chal rahe hain?

Patient: Sirf multivitamin.

Doctor: Weight-loss supplements?

Patient: Nahi.

Family History

Doctor: Family mein thyroid ki problem kisi ko hai?

Patient: Meri mummy ko thyroid hai.

Doctor: Hypothyroid ya hyperthyroid?

Patient: Exact nahi pata.

Doctor: Aur kisi ko autoimmune disease?

Patient: Nahi.

Social History

Doctor: Smoking?

Patient: Nahi.

Doctor: Alcohol?

Patient: Occasionally parties mein.

Doctor: Coffee kitni peeti ho?

Patient: 3-4 cups daily.

Doctor: Recent exams ya stress?

Patient: Placement season chal raha hai.

Review of Systems

Doctor: Loose motions?

Patient: Haan, pehle se zyada frequent ho gaye hain.

Doctor: Hair fall?

Patient: Thoda.

Doctor: Neck mein swelling notice ki hai?

Patient: Haan, mummy ne bola tha ki gala thoda bada lag raha hai.

Doctor: Vision problem? Aankhen ubhri hui lagti hain?

Patient: Kabhi kabhi dryness lagti hai.

Physical Examination

Vital Signs

BP: 138/78 mmHg

Pulse: 118/min

Temperature: Normal

Weight: 52 kg

Clinical Findings (spoken aloud)

Doctor: Pulse kaafi fast hai.

Mild hand tremors present.

Patient anxious lag rahi hai.

Neck examination mein mild diffuse thyroid enlargement feel ho raha hai.

No lymph node enlargement.

Clinical Discussion

Patient: Doctor, kya lag raha hai?

Doctor: Symptoms thyroid hormone zyada hone ki taraf point kar rahe hain.

Patient: Thyroid?

Doctor: Haan, specifically hyperthyroidism.

Patient: Isliye weight kam ho raha hai?

Doctor: Bilkul. Increased appetite ke bawajood weight loss, palpitations, tremors, sweating — sab usi taraf indicate karte hain.

Differential Diagnosis

1. Hyperthyroidism
 2. Graves' Disease
 3. Toxic Multinodular Goiter
 4. Anxiety Disorder
 5. Thyroiditis
-

Investigations Ordered

Blood Tests

- TSH
- Free T3
- Free T4
- CBC
- Liver Function Test
- Blood Sugar

Additional Tests

- ECG
 - Thyroid Ultrasound
 - Thyroid Antibody Profile (if needed)
-

Prescription

Tab Propranolol 20 mg

- Twice daily

Tab Pantoprazole 40 mg

- Once daily before breakfast

Multivitamin Tablet

- Once daily

(Definitive thyroid treatment after reports)

Counseling

Doctor: Main abhi anti-thyroid medicines start nahi karunga.

Patient: Kyun?

Doctor: Pehle reports confirm karni zaroori hain.

Patient: Accha.

Doctor: Propranolol se palpitations aur tremors kam ho jayenge.

Advice / Instructions

Doctor:

- Excess tea/coffee avoid karo.
- Adequate sleep lo.
- Reports jaldi kara lo.
- Agar severe palpitations, chest pain ya breathlessness ho toh immediately hospital jaana.

Patient: Ji doctor.

Follow-Up Plan

Doctor: Reports ke saath 4-5 din mein milna.

Patient: Theek hai.

Doctor: Tab exact diagnosis aur treatment decide karenge.

Patient: Thank you doctor.

Doctor: Take care.

CASE 2 – NEW PATIENT INTERACTION

Chronic Joint Pain, Morning Stiffness & Suspected Rheumatoid Arthritis

(Long-form Hinglish consultation designed for healthcare transcription testing)

Patient Registration

Doctor: Namaste, please come in.

Patient: Namaste doctor.

Doctor: First time visit hai?

Patient: Ji doctor.

Doctor: Theek hai, pehle registration kar lete hain.

Doctor: Aapka naam?

Patient: Anjali Verma.

Doctor: Age?

Patient: 39 years.

Doctor: Occupation?

Patient: Main bank mein assistant manager hoon.

Doctor: Married?

Patient: Haan.

Doctor: Kahan rehti hain?

Patient: Hinjewadi, Pune.

Doctor: Height aur weight approximately?

Patient: Height 5 foot 4 inch, weight 64 kilo.

Chief Complaint

Doctor: Toh Anjali ji, kya problem hai?

Patient: Doctor saab, pichhle 5-6 mahine se haath aur kalaiyon mein dard ho raha hai.

Doctor: Dono haathon mein?

Patient: Haan, dono mein.

Doctor: Aur koi joints?

Patient: Ungliyon ke joints aur kabhi kabhi pairon mein bhi.

History of Present Illness

Doctor: Dard kab zyada hota hai?

Patient: Subah uthte hi.

Doctor: Kitni der tak rehta hai?

Patient: Kam se kam ek ghanta.

Doctor: Ek ghanta?

Patient: Kabhi kabhi usse bhi zyada.

Doctor: Din mein movement karne se improve hota hai?

Patient: Haan, thoda chalne phirne se better lagta hai.

Doctor: Swelling bhi hoti hai?

Patient: Haan doctor, especially fingers mein.

Doctor: Redness?

Patient: Kabhi kabhi.

Doctor: Koi injury hui thi?

Patient: Nahi.

Doctor: Pain scale pe kitna dard hai?

Patient: Subah 8/10 tak hota hai.

Functional History

Doctor: Daily activities affect ho rahi hain?

Patient: Bahut.

Doctor: Example?

Patient: Bottle kholna mushkil ho gaya hai.

Doctor: Kapde ke buttons lagane mein?

Patient: Haan.

Doctor: Computer typing?

Patient: Long time typing karne mein pain hota hai.

Associated Symptoms

Doctor: Fatigue rehti hai?

Patient: Haan, bahut.

Doctor: Fever?

Patient: Nahi.

Doctor: Weight loss?

Patient: 2-3 kilo kam hua hai.

Doctor: Appetite?

Patient: Thoda kam ho gaya hai.

Past Medical History

Doctor: Diabetes?

Patient: Nahi.

Doctor: Thyroid?

Patient: Nahi.

Doctor: TB?

Patient: Nahi.

Doctor: Koi autoimmune disease pehle diagnose hui?

Patient: Nahi.

Doctor: Hospitalization?

Patient: Nahi.

Medication History

Doctor: Is pain ke liye kya le rahi ho?

Patient: Medical store se painkiller le leti hoon.

Doctor: Kaunsi?

Patient: Combiflam mostly.

Doctor: Kitni baar?

Patient: Week mein 3-4 baar.

Family History

Doctor: Family mein kisi ko joint disease hai?

Patient: Meri mummy ko arthritis hai.

Doctor: Rheumatoid arthritis ya normal arthritis?

Patient: Rheumatoid arthritis bola tha doctor ne.

Doctor: Accha.

Social History

Doctor: Smoking?

Patient: Nahi.

Doctor: Alcohol?

Patient: Nahi.

Doctor: Exercise?

Patient: Ab pain ki wajah se kam ho gaya hai.

Review of Systems

Doctor: Mouth ulcers?

Patient: Nahi.

Doctor: Hair fall?

Patient: Thoda.

Doctor: Skin rashes?

Patient: Nahi.

Doctor: Dry eyes ya dry mouth?

Patient: Kabhi kabhi eyes dry lagti hain.

Physical Examination

Vital Signs

BP: 122/78 mmHg

Pulse: 84/min

Temperature: Normal

Weight: 64 kg

Clinical Findings (spoken aloud)

Doctor: Bilateral MCP aur PIP joints mein mild swelling hai.

Tenderness present.

Grip strength mildly reduced.

Wrist movements painful hain.

No major deformity present.

Knee joints normal lag rahe hain.

Clinical Discussion

Patient: Doctor saab kya lag raha hai?

Doctor: Mujhe inflammatory arthritis lag rahi hai.

Patient: Matlab?

Doctor: Aapke symptoms — morning stiffness, multiple joints involvement, swelling, family history — rheumatoid arthritis ki taraf point karte hain.

Patient: Ye permanent disease hai?

Doctor: Early diagnosis aur treatment se kaafi achha control ho sakta hai.

Differential Diagnosis

1. Rheumatoid Arthritis
 2. Early Seronegative Inflammatory Arthritis
 3. Systemic Lupus Erythematosus (Less Likely)
 4. Osteoarthritis (Less Likely due to age and pattern)
 5. Viral Polyarthritis
-

Investigations Ordered

Blood Tests

- CBC
- ESR
- CRP
- Rheumatoid Factor (RF)
- Anti-CCP Antibody
- ANA Profile
- Liver Function Test
- Kidney Function Test

Imaging

- X-Ray Both Hands and Wrists
-

Prescription

Tab Aceclofenac 100 mg

- Twice daily after food for 5 days

Tab Pantoprazole 40 mg

- Once daily before breakfast

Calcium + Vitamin D Tablet

- Once daily

(Disease-modifying treatment after reports and rheumatology assessment)

Counseling

Patient: Kya mujhe operation lagega?

Doctor: Bilkul nahi. Abhi uski zaroorat nahi lagti.

Patient: Accha.

Doctor: Pehle diagnosis confirm karte hain.

Patient: Theek hai.

Doctor: Rheumatoid arthritis mein early treatment bahut important hota hai.

Advice / Instructions

Doctor:

- Heavy lifting avoid karo.
- Warm water fomentation kar sakti ho.
- Reports jaldi kara lo.
- Painkiller unnecessarily repeat mat karna.

Patient: Ji doctor.

Doctor: Agar severe swelling ya sudden worsening ho toh immediately contact karna.

Follow-Up Plan

Doctor: Reports ke saath 1 week mein milna.

Patient: Zaroor.

Doctor: Tab final diagnosis aur long-term treatment discuss karenge.

Patient: Thank you doctor.

Doctor: Take care.

CASE 3 – NEW PATIENT

Acute Low Back Pain

Registration

Doctor: Naam?

Patient: Santosh Jagtap.

Doctor: Age?

Patient: 41.

Doctor: Kya kaam karte ho?

Patient: Warehouse mein kaam karta hoon.

Chief Complaint

Patient: Kamar mein bahut dard hai.

History

Doctor: Kab se?

Patient: Kal se.

Doctor: Koi weight uthaya tha?

Patient: Haan 25 kilo ka carton uthaya tha.

Doctor: Pair mein dard ya jhanjhanahat?

Patient: Nahi.

Doctor: Urine problem?

Patient: Nahi.

Examination

BP: 126/82 mmHg

Lumbar muscle spasm present

Straight Leg Raise negative

Differential Diagnosis

1. Mechanical Low Back Pain
 2. Lumbar Muscle Strain
 3. Disc Prolapse (less likely)
-

Prescription

Tab Aceclofenac 100 mg

- BD after food

Tab Thiocolchicoside 4 mg

- BD

Diclofenac Gel

- Local application
-

Advice

Heavy lifting avoid karo.

Hot fomentation karo.
