

CASE 1 – FAMILY DOCTOR FOLLOW-UP

Hypothyroidism + Iron Deficiency Anemia + Menstrual Irregularities

(Long-form Hinglish consultation for transcription testing)

Patient Details

Patient Name: Neha Patil

Age: 34 years

Gender: Female

Visit Type: Follow-up Visit (Known Patient)

Previous Visits: Patient has been visiting this family physician for 5 years. Diagnosed with hypothyroidism 8 months ago.

Doctor–Patient Conversation

Doctor: Namaste Neha. Kaafi din baad aana hua. Kaisi ho?

Patient: Namaste doctor. Honestly bolu toh bilkul energetic feel nahi kar rahi hoon.

Doctor: Last time bhi fatigue ki complaint thi. Thyroid medicines regular chal rahi hain?

Patient: Haan doctor, roz leti hoon.

Doctor: Kis time leti ho?

Patient: Subah uthkar.

Doctor: Breakfast ke kitni der pehle?

Patient: Kabhi 10 minute pehle, kabhi 15 minute pehle.

Doctor: Accha. Maine bola tha kam se kam 30-45 minute ka gap rakhna hai.

Patient: Haan, wo maintain nahi ho pata kabhi kabhi.

Doctor: Theek hai. Aur kya problems chal rahi hain?

Patient: Thakan bahut rehti hai. Office se ghar aati hoon toh kuch karne ka mann hi nahi karta.

Doctor: Sleep theek aa rahi hai?

Patient: Haan, lekin fir bhi fresh nahi lagta.

Doctor: Weight ka kya hua?

Patient: Aur badh gaya doctor.

Doctor: Kitna?

Patient: Last time 72 tha shayad. Ab 77 ho gaya.

Doctor: Diet mein koi major change?

Patient: Nahi.

Doctor: Exercise?

Patient: Bilkul nahi ho pa rahi.

Detailed Symptom History

Doctor: Hair fall abhi bhi ho raha hai?

Patient: Haan doctor. Bathroom mein aur pillow pe bahut baal girte hain.

Doctor: Dry skin?

Patient: Especially haath aur pair mein.

Doctor: Constipation?

Patient: Haan. Kabhi kabhi 2-3 din tak properly motion nahi hota.

Doctor: Cold zyada lagti hai dusron ke comparison mein?

Patient: Bilkul. Office mein sabko AC normal lagta hai aur mujhe thand lagti rehti hai.

Doctor: Mood kaisa rehta hai?

Patient: Irritated rehti hoon.

Doctor: Anxiety ya stress?

Patient: Work ka stress toh hai.

Menstrual History

Doctor: Periods regular hain?

Patient: Nahi.

Doctor: Last period kab hua tha?

Patient: Lagbhag 45 din pehle.

Doctor: Flow kaisa tha?

Patient: Pehle do din bahut heavy tha.

Doctor: Clots aate hain?

Patient: Haan.

Doctor: Pehle bhi heavy periods hote the?

Patient: Pichhle ek saal se.

Doctor: Pregnancy ka koi chance?

Patient: Nahi doctor.

Previous Reports Discussion

Doctor: Last reports laaye ho?

Patient: Haan.

(Paper rustling sound)

Doctor: TSH pichli baar 8.9 tha.

Patient: Iska matlab medicine kaam nahi kar rahi?

Doctor: Medicine kaam kar rahi hai lekin dose insufficient ho sakti hai ya timing sahi nahi hai.

Patient: Accha.

Doctor: Hemoglobin bhi pichli baar 9.8 tha.

Patient: Haan mujhe yaad hai.

Doctor: Iron tablets li thi?

Patient: Pehle li thi, phir constipation hone laga toh band kar di.

Doctor: Mujhe bataya kyun nahi?

Patient: Socha normal side effect hoga.

Family History

Doctor: Family mein thyroid ka history hai?

Patient: Mummy ko hypothyroidism hai.

Doctor: Diabetes?

Patient: Papa ko hai.

Doctor: Koi autoimmune disease?

Patient: Nahi.

Lifestyle History

Doctor: Office work hi hai na?

Patient: Haan, software company mein HR hoon.

Doctor: Sitting job?

Patient: Poora din laptop ke saamne.

Doctor: Water intake kitna rehta hai?

Patient: Bahut kam.

Doctor: Approximately?

Patient: Shayad 1 litre.

Doctor: Kam se kam 2.5 litre toh hona chahiye.

Physical Examination

Doctor: Chaliye check karte hain.

BP measured.

Doctor: BP 118/76 hai.

Pulse 58 per minute.

Weight 77 kg.

Temperature normal.

Clinical Findings Spoken Aloud

Doctor: Mild facial puffiness hai.

Skin dry lag rahi hai.

Conjunctiva thodi pale lag rahi hai.

No pedal edema.

No thyroid enlargement visible.

Clinical Discussion

Doctor: Dekho Neha, tumhare symptoms mujhe primarily thyroid ki taraf point kar rahe hain.

Patient: Matlab thyroid badh gaya hai?

Doctor: Ho sakta hai thyroid hormone abhi bhi adequately controlled na ho.

Patient: Aur weakness?

Doctor: Weakness thyroid ki wajah se bhi ho sakti hai aur anemia ki wajah se bhi.

Patient: Dono saath mein?

Doctor: Bilkul.

Differential Diagnosis

Doctor: Mere mind mein abhi kuch possibilities hain:

1. Inadequately Controlled Hypothyroidism
 2. Iron Deficiency Anemia
 3. Menorrhagia leading to anemia
 4. Vitamin B12 Deficiency
 5. Vitamin D Deficiency
 6. Early Perimenopausal Hormonal Changes
-

Investigations Ordered

Doctor: Main kuch blood tests likh raha hoon.

- TSH
- Free T3
- Free T4
- Complete Blood Count
- Serum Ferritin
- Iron Profile
- Vitamin B12
- Vitamin D3
- Blood Sugar (Fasting)
- Liver Function Test
- Kidney Function Test

Patient: Itne saare tests?

Doctor: Haan kyunki fatigue ke multiple causes ho sakte hain.

Prescription

Tab Levothyroxine 75 mcg

- Empty stomach
- Daily morning
- Breakfast se 45 minutes pehle

Tab Iron + Folic Acid

- Once daily after lunch

Tab Vitamin C 500 mg

- Once daily

Cap Vitamin D3 60,000 IU

- Once weekly for 8 weeks

Tab Methylcobalamin 1500 mcg

- Once daily after dinner
-

Advice / Instructions

Doctor: Kuch important instructions hain.

- Thyroid medicine chai ya coffee ke saath nahi leni.
- Medicine ke baad kam se kam 45 minute tak kuch nahi khana.
- Iron tablet aur thyroid tablet saath mein nahi leni.
- Daily 30 minute walk start karni hai.
- Weight reduction target rakho.
- Water intake 2.5–3 litre.
- Sleep minimum 7 hours.

Patient: Ji doctor.

Doctor: Agar excessive bleeding ho ya dizziness ho toh immediately contact karna.

Patient: Theek hai.

Doctor: Reports aane ke baad dose adjust karenge.

Patient: Follow-up kab?

Doctor: 4 weeks mein.

Patient: Thank you doctor.

Doctor: Take care, Neha.

CASE 2 – FAMILY DOCTOR FOLLOW-UP

Type 2 Diabetes + Hypertension + Neuropathy Follow-Up

(Long-form Hinglish conversation for transcription testing)

Patient Details

Patient Name: Rajesh Sharma

Age: 61 years

Gender: Male

Visit Type: Follow-up Visit (Known Patient)

Doctor–Patient Conversation

Doctor: Namaste Rajesh ji, aaiye baithiye. Kaise chal raha hai sab?

Patient: Namaste doctor saab. Theek hi chal raha hai, bas thodi weakness aur pairon mein jalan zyada ho rahi hai.

Doctor: Achha. Last visit ko lagbhag teen mahine ho gaye hain. Us time HbA1c 9.1 tha aur sugar ka control kaafi poor tha. Uske baad jo medicines badhai thi, regular li?

Patient: Haan doctor saab, mostly regular li. Lekin kabhi kabhi raat wali tablet miss ho jati hai.

Doctor: Kitni baar miss hoti hai? Mahine mein ek-do baar ya zyada?

Patient: Shayad hafte mein do ya teen baar.

Doctor: Haan toh phir sugar control kaise hoga? Diabetes ki medicines consistency se leni padti hain.

Patient: Ji doctor saab. Ab dhyan rakhunga.

Doctor: Sugar ghar pe monitor kar rahe ho?

Patient: Haan. Mere bete ne glucometer le diya tha.

Doctor: Achha. Fasting aur post-meal readings batao.

Patient: Fasting mostly 160 se 180 ke beech rehti hai. Kabhi kabhi 190 bhi aa jati hai.

Doctor: Aur khane ke do ghante baad?

Patient: 230 se 260 ke aas paas.

Doctor: Hmmm. Kaafi high hai.

Doctor: Pyaas zyada lagti hai abhi bhi?

Patient: Haan doctor saab. Paani peene ka mann karta rehta hai.

Doctor: Urine frequency?

Patient: Din mein toh theek hai, lekin raat ko teen-chaar baar uthna padta hai.

Doctor: Koi burning sensation ya infection ka symptom?

Patient: Nahi.

Doctor: Weight kam hua ya badha?

Patient: Kam toh nahi hua. Shayad badh gaya hoga.

Doctor: Chaliye check karte hain.

Previous History Discussion

Doctor: Aur diet ka kya chal raha hai? Last time maine bola tha ki sweets aur bakery items kam karne hain.

Patient: Doctor saab sach bolun toh pichhle mahine meri bhatiji ki shaadi thi. Thoda control nahi ho paya.

Doctor: Thoda matlab?

Patient: Mithai kha li thi. Gulab jamun, rasmalai aur ice cream bhi.

Doctor: (laughs) Aur phir bol rahe ho sugar high kyun hai.

Patient: Ji galti ho gayi.

Doctor: Exercise?

Patient: Walk karta hoon lekin regular nahi.

Doctor: Kitna walk karte ho?

Patient: Hafte mein do ya teen din.

Doctor: Rajesh ji, diabetes medicines se aadha control hota hai aur aadha lifestyle se.

Neuropathy Symptoms

Doctor: Pairon mein jalan kab se ho rahi hai?

Patient: Lagbhag chhe mahine se.

Doctor: Constant rehti hai ya raat ko zyada?

Patient: Raat ko zyada hoti hai.

Doctor: Jhanjhanahat bhi hoti hai?

Patient: Haan.

Doctor: Sunpan?

Patient: Kabhi kabhi lagta hai jaise pair sunn ho rahe hain.

Doctor: Chalte waqt balance ka issue?

Patient: Nahi.

Doctor: Pair mein koi ghaav ya chot hui recently?

Patient: Nahi doctor.

Vision Related Symptoms

Doctor: Nazar kaisi hai?

Patient: Thoda blur lagta hai.

Doctor: Door ka ya paas ka?

Patient: Dono mein thoda issue hai.

Doctor: Eye specialist ko last kab dikhaya tha?

Patient: Do saal pehle.

Doctor: Diabetes patient mein saal mein ek baar retina check karana zaroori hai.

Hypertension Follow-Up

Doctor: BP ki medicines regular chal rahi hain?

Patient: Haan.

Doctor: Telmisartan 40 mg?

Patient: Ji.

Doctor: Ghar pe BP monitor karte ho?

Patient: Kabhi kabhi.

Doctor: Readings yaad hain?

Patient: Usually 150 ke aas paas.

Doctor: Headache rehta hai?

Patient: Subah uthte waqt kabhi kabhi.

Doctor: Chakkar?

Patient: Nahi.

Doctor: Chest pain ya pressure?

Patient: Nahi.

Doctor: Breathlessness?

Patient: Nahi.

Medication Adherence Review

Doctor: Medicines ka naam batao jo abhi le rahe ho.

Patient: Metformin, Glimepiride, Telmisartan aur cholesterol wali tablet.

Doctor: Atorvastatin?

Patient: Haan wahi.

Doctor: Koi side effect?

Patient: Nahi.

Doctor: Hypoglycemia hua kabhi? Matlab sweating, ghabrahat, haath kaanpna?

Patient: Ek baar hua tha.

Doctor: Sugar check ki thi us waqt?

Patient: 68 aayi thi.

Doctor: Uske baad kya kiya?

Patient: Biscuit kha liya tha.

Doctor: Sahi kiya.

Physical Examination

Doctor: Chaliye BP check karte hain.

(BP measured)

Doctor: BP 158/96 hai.

Doctor: Pulse 84 per minute.

Doctor: Weight 87 kilo.

Doctor: Last visit pe 84 kilo tha.

Patient: Haan doctor saab.

Foot Examination (spoken aloud)

Doctor: Shoes nikaliye.

(Patient removes shoes)

Doctor: Koi ulcer nahi hai.

Doctor: Skin thodi dry lag rahi hai.

Doctor: Vibration sensation mildly reduced hai.

Doctor: Peripheral pulses present hain.

Doctor: Filhal koi serious foot complication nahi lag raha.

Doctor's Assessment

Doctor: Rajesh ji, mujhe lag raha hai ki diabetes abhi bhi adequately controlled nahi hai.

Patient: Ji.

Doctor: Pairon ki burning diabetic neuropathy ki wajah se ho sakti hai.

Patient: Ye dangerous hai kya?

Doctor: Agar sugar uncontrolled rahe toh badh sakti hai. Isliye sugar control karna bahut zaroori hai.

Differential Diagnosis Discussed

Doctor: Mere mind mein abhi kuch possibilities hain:

1. Poorly controlled Type 2 Diabetes Mellitus.
 2. Diabetic Peripheral Neuropathy.
 3. Uncontrolled Hypertension.
 4. Early Diabetic Retinopathy.
 5. Possible Diabetic Kidney Disease ko bhi rule out karna hai.
-

Investigations Ordered

Doctor: Main kuch tests likh raha hoon:

- HbA1c
- Fasting Blood Sugar
- Post-Prandial Blood Sugar
- Urine Microalbumin
- Serum Creatinine
- Lipid Profile
- Liver Function Test
- Complete Blood Count
- Fundus Examination by Ophthalmologist

Patient: Ye sab fasting mein karwana hai?

Doctor: HbA1c fasting nahi mangta, lekin sugar ke liye fasting rehna padega.

Prescription

Doctor: Medicines mein thoda change karte hain.

Prescription

Tab Metformin XR 1000 mg

- 1 tablet twice daily after meals

Tab Glimepiride 2 mg

- 1 tablet before breakfast

Tab Empagliflozin 10 mg

- 1 tablet once daily in morning

Tab Telmisartan 40 mg

- 1 tablet once daily

Tab Atorvastatin 20 mg

- 1 tablet at bedtime

Cap Methylcobalamin 1500 mcg

- 1 capsule once daily after dinner
-

Advice / Instructions

Doctor: Kuch important baatein note kar lijiye.

- Daily minimum 45 minutes walk.
- Mithai, sugary drinks aur bakery items avoid karne hain.
- Roz fasting aur post-meal sugar note karni hai.
- Pairon ko daily inspect karna hai.
- Barefoot mat chalna.
- Eye check-up kara lijiye.
- Water intake adequate rakhiye.
- Medicine miss nahi karni.

Patient: Ji doctor saab.

Doctor: Agar sugar 300 se upar jaye ya severe weakness ho toh immediately contact karna.

Patient: Theek hai.

Doctor: Reports lekar 15 din baad milna.

Patient: Thank you doctor saab.

Doctor: Take care Rajesh ji.

CASE 3 – FAMILY DOCTOR FOLLOW-UP

Recurrent Migraine + Sleep Disturbance

(Short Follow-Up Case with 3–4 Medicines)

Patient Details

Patient Name: Kavita Sharma

Age: 36 years

Gender: Female

Occupation: School Teacher

Known History:

- Migraine for 5 years
 - Follow-up after starting preventive treatment 2 months ago
-

Doctor–Patient Conversation

Doctor: Namaste Kavita ji, headaches kaise hain ab?

Patient: Namaste doctor. Frequency toh kam hui hai, lekin jab headache aata hai toh kaafi severe hota hai.

Doctor: Pichli baar mahine mein kitne episodes hote the?

Patient: 8-10 baar.

Doctor: Aur ab?

Patient: Shayad 3-4 baar.

Doctor: That's good improvement. Headache abhi bhi ek side hota hai?

Patient: Haan, mostly left side.

Doctor: Nausea ya vomiting?

Patient: Nausea hoti hai, vomiting nahi.

Doctor: Light aur noise se problem?

Patient: Haan, headache ke time room dark karna padta hai.

Doctor: Sleep kaisi hai?

Patient: Achhi nahi hai doctor. Raat ko der se neend aati hai.

Doctor: School ka stress zyada hai kya?

Patient: Exams chal rahe hain toh thoda workload zyada hai.

Doctor: Preventive medicine regular le rahi ho?

Patient: Haan, ek bhi dose miss nahi ki.

Doctor: Very good.

Clinical Examination

BP: 116/74 mmHg

Pulse: 72/min

Neurological examination normal

No focal deficits

Vision grossly normal

Differential Diagnosis

1. Migraine without Aura (Improving)
 2. Stress-Induced Migraine Trigger
 3. Sleep Disturbance Contributing to Headaches
 4. Episodic Tension-Type Headache
-

Investigations

No investigations required at present.

Prescription

Tab Propranolol 40 mg

- Once daily at bedtime

Tab Sumatriptan 50 mg

- SOS at onset of migraine attack

Tab Melatonin 3 mg

- Once daily at bedtime for 2 weeks

Tab Pantoprazole 40 mg

- Before breakfast if required during migraine medication use
-

Advice

Doctor: Sleep schedule fix karna bahut important hai.

Patient: Ji.

Doctor: Mobile aur laptop bedtime se 1 hour pehle band kar do.

Patient: Koshish karungi.

Doctor: Migraine diary maintain karte rehna.

Patient: Okay.

Doctor: Agar headache pattern suddenly change ho ya vision problem ho toh immediately contact karna.

Patient: Sure doctor.

Doctor: 6 weeks baad follow-up karte hain.

Patient: Thank you doctor.

Doctor: Take care.

CASE 1 – NEW PATIENT INTERACTION

Newly Diagnosed Type 2 Diabetes Mellitus

Patient Registration

Doctor: Namaste. Please aaiye, baithiye.

Patient: Namaste doctor.

Doctor: Aap pehli baar aaye hain hamare clinic mein?

Patient: Ji doctor.

Doctor: Theek hai, pehle basic details le lete hain.

Doctor: Aapka poora naam?

Patient: Mahesh Patil.

Doctor: Age?

Patient: 47 saal.

Doctor: Date of birth yaad hai?

Patient: 14 August 1978.

Doctor: Occupation?

Patient: Main transport business karta hoon.

Doctor: Married?

Patient: Ji.

Doctor: Address?

Patient: Kothrud, Pune.

Doctor: Mobile number verify kar dijiye.

Patient: 98XXXXXXXX.

Chief Complaint

Doctor: Toh Mahesh ji, aaj kis problem ke liye aaye hain?

Patient: Doctor saab pichhle 3-4 mahine se bahut pyaas lagti hai.

Doctor: Accha.

Patient: Aur baar baar urine bhi aata hai.

Doctor: Aur?

Patient: Weakness rehti hai.

Doctor: Kuch aur?

Patient: Weight bhi kam ho gaya hai.

History of Present Illness

Doctor: Weight kitna kam hua?

Patient: Lagbhag 7-8 kilo.

Doctor: Intentionally kam kiya ya apne aap?

Patient: Apne aap.

Doctor: Appetite kaisa hai?

Patient: Bhook toh lagti hai.

Doctor: Zyada lagti hai ya normal?

Patient: Shayad pehle se zyada.

Doctor: Pyaas kitni lagti hai?

Patient: Roz 5-6 litre paani pee leta hoon.

Doctor: Raat ko uthkar paani peena padta hai?

Patient: Haan.

Doctor: Urine kitni baar?

Patient: Din mein toh pata nahi, lekin raat mein 4-5 baar uthta hoon.

Doctor: Blurring of vision?

Patient: Haan kabhi kabhi.

Doctor: Koi infection hua recently?

Patient: Skin pe fungal infection hua tha.

Past Medical History

Doctor: Pehle kabhi diabetes diagnose hui thi?

Patient: Nahi.

Doctor: Blood pressure?

Patient: Nahi pata.

Doctor: Thyroid?

Patient: Nahi.

Doctor: Asthma?

Patient: Nahi.

Doctor: Tuberculosis?

Patient: Nahi.

Doctor: Hospital admission kabhi hua?

Patient: Nahi.

Medication History

Doctor: Koi regular medicines lete ho?

Patient: Nahi.

Doctor: Ayurvedic ya supplements?

Patient: Ek powder le raha tha kisi ne suggest kiya tha sugar ke liye.

Doctor: Kaunsa powder?

Patient: Naam yaad nahi.

Family History

Doctor: Family mein diabetes hai?

Patient: Haan.

Doctor: Kisko?

Patient: Mere father aur bade bhai ko.

Doctor: Father ki age kitni thi diagnosis ke time?

Patient: Lagbhag 50.

Doctor: Heart disease?

Patient: Father ko bypass surgery hui thi.

Social History

Doctor: Smoking?

Patient: Haan.

Doctor: Kitni?

Patient: 10 cigarette roz.

Doctor: Kitne saal se?

Patient: 20 saal se.

Doctor: Alcohol?

Patient: Weekend pe.

Doctor: Exercise?

Patient: Bilkul nahi.

Diet History

Doctor: Breakfast mein kya lete ho?

Patient: Chai aur biscuit.

Doctor: Lunch?

Patient: Rice aur roti.

Doctor: Soft drinks?

Patient: Roz peeta hoon.

Doctor: Mithai?

Patient: Kaafi pasand hai.

Clinical Examination

Vitals

BP: 152/94 mmHg

Pulse: 88/min

Temperature: Normal

Weight: 82 kg

Height: 171 cm

BMI: 28 kg/m²

Examination Spoken Aloud

Doctor: Patient overweight hai.

No pedal edema.

No acute distress.

Random glucometer reading karte hain.

(Finger prick performed)

Doctor: Sugar 312 mg/dL aa rahi hai.

Patient: Itni zyada?

Doctor: Haan.

Clinical Discussion

Patient: Matlab mujhe diabetes hai?

Doctor: Bahut strong possibility hai.

Patient: Confirm kaise hoga?

Doctor: Blood tests se.

Patient: Ye serious hai?

Doctor: Control na kiya toh serious ho sakta hai. Lekin early treatment se achha control ho jata hai.

Differential Diagnosis

1. Newly Diagnosed Type 2 Diabetes Mellitus
 2. Prediabetes with Severe Hyperglycemia
 3. Secondary Diabetes (less likely)
 4. Metabolic Syndrome
-

Investigations Ordered

- HbA1c
- Fasting Blood Sugar
- Post-Prandial Blood Sugar

- CBC
 - Liver Function Test
 - Kidney Function Test
 - Lipid Profile
 - Urine Routine
 - Urine Microalbumin
 - ECG
-

Prescription

Tab Metformin 500 mg

- Twice daily after meals

Tab Telmisartan 40 mg

- Once daily

Cap Multivitamin

- Once daily
-

Lifestyle Counseling

Doctor: Mahesh ji, treatment ka aadha part medicines hain aur aadha lifestyle.

Patient: Ji.

Doctor: Smoking band karni padegi.

Patient: Koshish karunga.

Doctor: Nahi, seriously band karni padegi.

Patient: Theek hai.

Doctor: Soft drinks aur sugary beverages immediately stop.

Patient: Ji.

Doctor: Daily 45 minute walk.

Patient: Karunga.

Advice / Instructions

Doctor:

- Blood tests fasting mein karwana.
- Sugar diary maintain karna.
- Smoking cessation.
- Weight reduction.
- Eye examination within next month.
- Reports lekar 1 week mein follow-up.

Patient: Thank you doctor.

Doctor: Take care.

CASE 2 – NEW PATIENT INTERACTION

Chest Pain Evaluation – Possible Coronary Artery Disease

(Long-form Hinglish consultation designed for transcription testing)

Patient Registration

Doctor: Namaste, please come in and have a seat.

Patient: Namaste doctor.

Doctor: First visit hai hamare clinic mein?

Patient: Ji doctor.

Doctor: Theek hai, pehle registration details le lete hain.

Doctor: Aapka poora naam?

Patient: Rakesh Agrawal.

Doctor: Age?

Patient: 56 saal.

Doctor: Occupation?

Patient: Main hardware store chalata hoon.

Doctor: Married?

Patient: Ji.

Doctor: Address?

Patient: Wakad, Pune.

Doctor: Height aur weight approximately?

Patient: Height 5 foot 8 inch, weight around 88 kilo.

Chief Complaint

Doctor: Toh Rakesh ji, aaj kis problem ke liye aaye hain?

Patient: Doctor saab, pichhle 2 hafte se chest mein dard ho raha hai.

Doctor: Kaisa dard?

Patient: Dard se zyada pressure ya heaviness lagta hai.

History of Present Illness

Doctor: Exactly kahan feel hota hai?

Patient: Yahan beech mein. (*Chest ki taraf ishara karta hai*)

Doctor: Left side ya center?

Patient: Mostly center mein.

Doctor: Kab hota hai?

Patient: Jab thoda fast chalta hoon ya seedhiyan chadhta hoon.

Doctor: Rest karne pe theek ho jata hai?

Patient: Haan, 5-10 minute mein.

Doctor: Left arm ya kandhe mein jata hai?

Patient: Kabhi kabhi left shoulder tak.

Doctor: Jaw ya gardan mein?

Patient: Ek-do baar gardan tak gaya tha.

Doctor: Sweating hoti hai?

Patient: Haan doctor, thoda paseena aa jata hai.

Doctor: Saans phoolti hai?

Patient: Haan, pain ke saath thodi breathlessness bhi hoti hai.

Doctor: Kabhi rest mein bhi hua?

Patient: Nahi, mostly chalne pe.

Detailed Risk Factor Assessment

Doctor: Diabetes hai?

Patient: Nahi pata.

Doctor: BP?

Patient: Last year kisi camp mein high bola tha.

Doctor: Medicine chal rahi hai?

Patient: Nahi.

Doctor: Cholesterol kabhi check karaya?

Patient: Nahi.

Past Medical History

Doctor: Hospital mein admit kabhi hue ho?

Patient: Nahi.

Doctor: Koi surgery hui hai?

Patient: Appendix ka operation hua tha 15 saal pehle.

Doctor: Asthma?

Patient: Nahi.

Doctor: Kidney disease?

Patient: Nahi.

Medication History

Doctor: Abhi koi regular medicine?

Patient: Nahi.

Doctor: Painkiller ya Ayurvedic medicines?

Patient: Kabhi kabhi joint pain ke liye painkiller leta hoon.

Family History

Doctor: Family mein heart disease?

Patient: Haan.

Doctor: Kisko?

Patient: Mere father ko 60 saal ki age mein heart attack hua tha.

Doctor: Aur kisi ko?

Patient: Bade bhai ko stent laga hai.

Doctor: Diabetes family mein?

Patient: Maa ko hai.

Social History

Doctor: Smoking?

Patient: Haan.

Doctor: Kitni?

Patient: Ek packet roz.

Doctor: Kitne saal se?

Patient: 30 saal se.

Doctor: Alcohol?

Patient: Weekends pe.

Doctor: Exercise?

Patient: Bilkul nahi.

Review of Systems

Doctor: Pairon mein swelling?

Patient: Nahi.

Doctor: Chakkar?

Patient: Nahi.

Doctor: Behoshi?

Patient: Nahi.

Doctor: Palpitations ya dhadkan tez chalna?

Patient: Kabhi kabhi.

Physical Examination

Vital Signs

BP: 162/98 mmHg

Pulse: 92/min

Respiratory Rate: 20/min

SpO₂: 98%

Weight: 89 kg

Clinical Findings (spoken aloud)

Doctor: Blood pressure kaafi high hai.

Pulse regular hai.

Heart sounds normal lag rahe hain.

Lungs clear hain.

No pedal edema.

BMI overweight range mein hai.

Immediate Office Testing

Doctor: Main ek ECG karwana chahta hoon.

(ECG performed)

Doctor: ECG mein kuch nonspecific changes dikh rahe hain, lekin emergency heart attack jaisa pattern nahi lag raha.

Patient: Matlab danger nahi hai?

Doctor: Filhal emergency nahi lag rahi, lekin ignore bhi nahi kar sakte.

Clinical Discussion

Doctor: Aapke symptoms mujhe heart se related lag rahe hain.

Patient: Serious ho sakta hai?

Doctor: Ho sakta hai. Isliye proper evaluation zaroori hai.

Patient: Operation toh nahi lagega?

Doctor: Abhi kuch kehna jaldi hoga. Pehle tests karte hain.

Differential Diagnosis

1. Stable Angina
 2. Coronary Artery Disease
 3. Uncontrolled Hypertension
 4. Gastroesophageal Reflux Disease (less likely)
 5. Musculoskeletal Chest Pain (less likely)
-

Investigations Ordered

- Troponin I
 - 2D Echocardiography
 - Treadmill Test (TMT)
 - CBC
 - Kidney Function Test
 - Liver Function Test
 - Lipid Profile
 - HbA1c
 - Fasting Blood Sugar
 - Chest X-Ray
-

Prescription

Tab Aspirin 75 mg

- Once daily after breakfast

Tab Atorvastatin 40 mg

- Once daily at bedtime

Tab Telmisartan 40 mg

- Once daily

Tab Sorbitrate 5 mg

- Under the tongue if chest pain occurs
-

Lifestyle Counseling

Doctor: Sabse pehli cheez — smoking band.

Patient: Doctor saab koshish karunga.

Doctor: Nahi, is stage pe "koshish" nahi chalegi.

Patient: Samajh gaya.

Doctor: Salt intake kam karna hai.

Patient: Ji.

Doctor: Weight reduce karna hai.

Patient: Theek hai.

Emergency Instructions

Doctor: Ek important baat.

Patient: Ji.

Doctor: Agar chest pain 15-20 minute se zyada rahe...

Patient: Haan.

Doctor: Ya sweating, breathlessness, vomiting ke saath ho...

Patient: Ji.

Doctor: Toh direct emergency jana hai. Clinic nahi.

Patient: Theek hai doctor.

Follow-Up Plan

Doctor: Reports aur cardiac tests ke saath 3 din mein milna.

Patient: Zaroor.

Doctor: Aur agar symptoms worsen ho toh wait mat karna.

Patient: Thank you doctor saab.

Doctor: Take care.

CASE 3 – NEW PATIENT

Acute Viral Fever

Registration

Doctor: Namaste. Naam?

Patient: Akshay More.

Doctor: Age?

Patient: 24 years.

Doctor: Kya karte ho?

Patient: Engineering student hoon.

Chief Complaint

Patient: Doctor saab, 3 din se fever hai.

History

Doctor: Temperature kitna gaya?

Patient: 101-102 tak.

Doctor: Khansi ya sardi?

Patient: Thodi khansi hai.

Doctor: Body pain?

Patient: Haan bahut.

Doctor: Koi travel history?

Patient: Nahi.

Doctor: Dengue ya malaria pehle hua tha?

Patient: Nahi.

Examination

Temperature: 101°F

Pulse: 96/min

BP: 118/74 mmHg

Throat mildly congested

Differential Diagnosis

1. Viral Fever
 2. Upper Respiratory Tract Infection
 3. Early Dengue (to be ruled out)
-

Investigations

CBC

Dengue NS1 (if fever persists)

Prescription

Tab Paracetamol 650 mg

- SOS for fever

Tab Cetirizine 10 mg

- Once daily at night

Vitamin C Tablet

- Once daily
-

Advice

Hydration maintain karo.

Rest karo.

3 din mein fever na utare toh review.
